

Press release

New Cargo Startup in Philippines, Skyway Airlines take-off with PPS Flight Planning System.

Billund, August 8th, 2024 — AIR SUPPORT A/S, a leading provider of flight planning and flight tracking software solutions, is delighted to announce its successful collaboration with Skyway Airlines Inc, which helps them streamline their flight operations with user-friendly and efficient software.

“Skyway Airlines Inc. has decided to choose PPS Flight planning system for our flight operations after careful evaluation on our options. PPS Flight planning is not only easy to use, but it can generate flight plan that provides all the essential information we need for our Flight operation. As an OCC Manager, it is always important for me to make Flight Plan that push each flight to the max operating limit and PPS’s instant calculation allow me to adjust the data easily. The overall startup experience with PPS Flight planning system is really a smooth process and highly recommend airlines to consider using PPS.” Explained Jules Verne M. Fernandez, OCC Manager at Skyway Airlines Inc.

“Air Support is very excited to welcome Skyway Airlines to be our customer. PPS Flight Planning is easy to learn and use by our customers. With the freedom to allow our customer to adjust PPS to fit their Flight Operation Policy, our customer does not need to spend great amount of money on “**Change Request**”. In addition, **Rules-Based Data Editor** which is uniquely available in PPS allow our customer to execute complex flight operation rules that build dynamic flight plan for different scenario operation. That is why a lot of Airline and Cargo operator has beginning to choose PPS for their Flight planning solution.” Explained John Tan, Sales Manager, Air Support

About Skyways Airlines Inc

Skyway Airlines, based in the Philippines, is a relatively new cargo airline that began operations in 2024. The airline primarily focuses on domestic air cargo services within the Philippines. Its initial operations include key routes from Clark International Airport to Cebu and Davao. The airline operates a Boeing 737-400F freighter, which is specifically designed for cargo operations and offers a capacity of 18 tonnes. This aircraft

allows Skyway Airlines to meet the growing demand for air freight services, particularly fueled by the rise in e-commerce in the region.

Skyway Airlines plans to expand its fleet and operations, aiming to become a significant player in the Asia-Pacific region's domestic and international air cargo markets. The company has also positioned itself to potentially launch international services by early 2025.
