

PPS X Release Note

Version 1.0.10, February 2025

Copy/Paste data into **RMK18** field

A new feature has implemented in **Editable ICAO FPL** in the *Home Menu* and **ATC sheet** in the *Dispatch Guide Item*. The user can now manually copy/paste data into the **Item 18 Other Information** from external documents and have these inserted in this field using **Edit as text**.

In **ICAO Flight Plan**, 2 options are now available to insert or modify the relevant RMK18 data. In previous PPS X versions only a *Browse* option was available to select the different options, but this is now divided into 2 options: **Edit as Text** or **Edit Structually** (the former *Browse* options)

18 OTHER INFORMATION

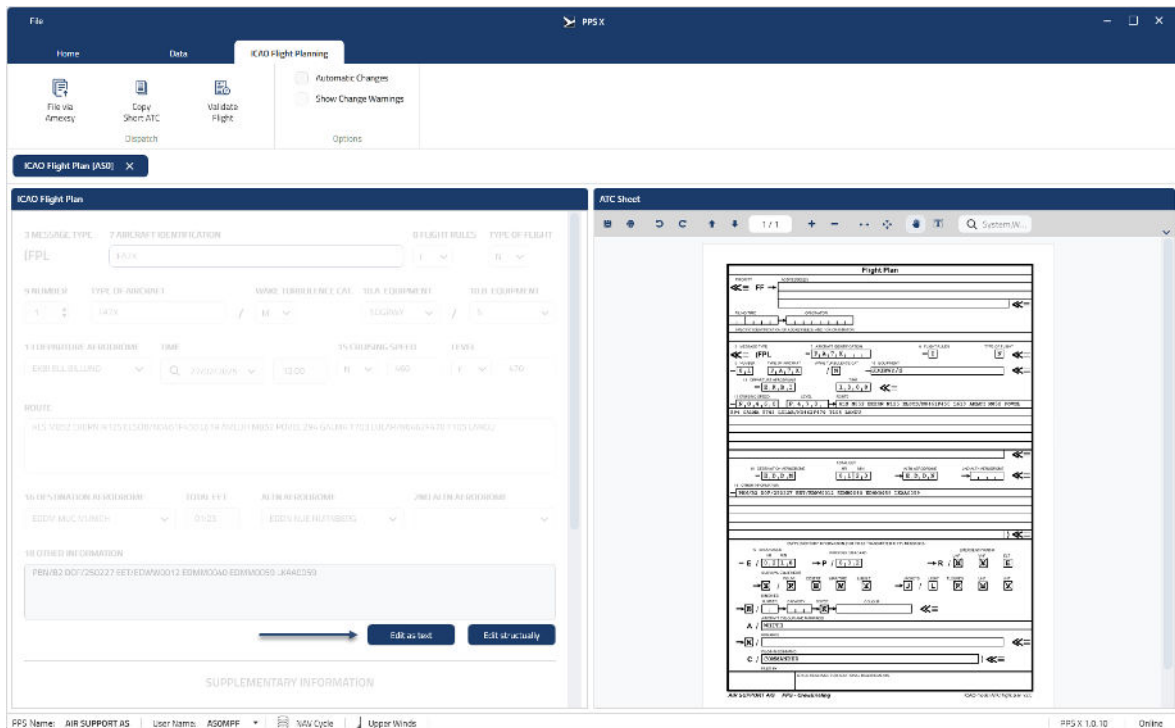

PBN/B2 DOF/250227 EET/EDWW0013 EDGG0037

Edit as text

Edit structually

Please note: The data copied into this field must comply with the standard ICAO syntax's, like RMK/, EET/, REG/, CODE/ etc.

You can either create an ICAO FPL from **new** or **modify** existing FPL in PPS X - and in below example a FPL is edited to add new information in Item 18.

New RMK18 data is now copied from an external document into **Edit as Text**.
